Data Analysis & Programming: R language

Data Visualization: Tableau, Excel and Google Sheets, PowerBI

Data Management: SQL, data cleaning, validation, transformation

Analytical Methods: Time-series forecasting, trend analysis

Professional Skills: Research support, data documentation, communication skills.

Experience and Academic projects

Cornerstone Asset Managers / Data Analyst Intern

May 2025 - July 2025, NTINDA, KAMPALA, UGANDA

Analyzed financial and operational datasets to support evidence-based decision-making. Cleaned and validated datasets to improve data reliability and reporting accuracy. Developed dashboards and analytical summaries used by internal stakeholders.

Retail Decision Dashboard/ ([View repo](#)/[Retail decision dashboard](#))

I designed a retail decision-automation pipeline, from raw transactional data through a warehouse to display a dashboard and an automated alerting layer to slack to show how a mid-size retailer could move from monthly manual reporting to near-realtime, action-oriented analytics, in line with where retail is actually heading in 2026 with agentic and automated decision support.

Business Growth Dashboard | Academic/ ([View project](#))

Built an interactive Tableau dashboard using the Inc. 5000 dataset to analyze industry performance. Enabled filtering by industry, company, number of workers and revenue

Education

Uganda Christian University / Bsc in Data Science and Analytics

August 2023 - April 2026, MUKONO

Graduated GPA:4.39
